HOW TO PROGRAM: *CREATE NEW* TPMS Sensor ID using the PREM-H47 TPMS Scan Tool
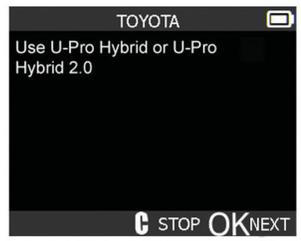

U-Pro HYBRID 2.0

1

From the main menu, select **PROGRAM SENSOR** and press **OK**.
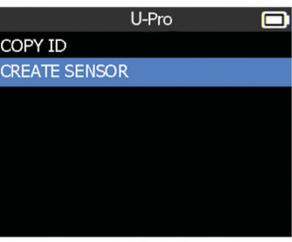

2

Select vehicle's **MAKE, MODEL** and **YEAR**.
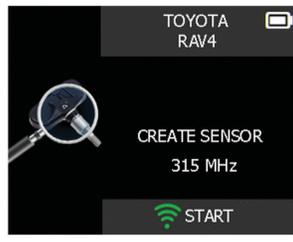

3

Select compatible **U-Pro Hybrid Sensor** and press **OK**.

4

Select **CREATE SENSOR**.

5

Hold the tool against the tire's sidewall in close vicinity of the sensor. Alternatively, if the sensor isn't in the tire, position the tool's antenna towards it, within 3-6 inches. Press the **TRIGGER** button to start.

6

CONFIGURING will show while the tool is creating a new ID.

7

Once complete, the new ID Number and **SUCCESSFUL** will be displayed. Press **OK** to finish.
